

Full Stack Laravel Developer

Looking for an opportunity where you can make a real difference to people's lives?

We are looking for a skilled full stack Laravel developer to join an emerging player in the digital health space. Ampersand health work with the NHS and help support patients across several therapeutic areas.

As we move in the direction of digital therapeutics and virtual clinics were expanding our inhouse team. You will be joining a small team of inhouse designers, mobile developers and behavioural scientists all sharing a common goal where what you do next will help others!

You...

- Demonstrable knowledge and excellent understanding of software design and programming principles.
- Equally at home with front end and backend development.
- Able to evaluate existing applications, update and add new features.
- Able to refactor, optimise and improve the existing codebase for maintenance, performance and scale.
- A problem solver with an analytical mindset and a keen eye for detail.
- A team player with excellent communication skills.
- Great attention to detail and time-management skills
- Able to work in an agile environment and familiar with Atlassian tools

7 things you need to be great at...

- PHP Laravel 5+
- Angular, Bootstrap & jQuery
- MVC & OOP
- Docker
- AWS

- CI/CD practitioner
- GIT & JIRA

The necessary boring bits...

The goal is to write “clean” and flawless code to deliver application releases on-time and according to agreed requirements.

Able to work in our London office.

The important stuff...

Remuneration/package will be competitive based on your knowledge and experience. Please state what your requirements are when applying. Ampersand Health is an equal opportunities employer.

To apply for this role please email meichele@ampersandhealth.co.uk with your CV
